State Aid Review – Next Steps

Municipal Appropriation Requirement and Waivers

Two further recommendations require additional review before a final determination can be presented: the Waiver process and the MAR calculation. Both require additional input from the library community, more focused research on current program elements, and a closer review of relevant data.

These items are being recommended for further review by a Task Force or Working Group (to be established).

The State Aid Unit will bring forward a request for the formation of a group to study the MAR and waivers at the April 2016 Board Meeting. The request will include the names and library affiliations of the proposed group membership.
